

Climate & Development Links: National decarbonization pathways toward 1.5 & 2°C and impacts on SDGs

Official side-event at COP23, Bonn
Monday 6th November 2017, 15:00-16:30
Location: Bonn Zone, Meeting Room 12

We present the latest findings on:

- ratcheting up the nationally determined contributions (NDCs) to keep the 1.5 and 2°C goals of the Paris Agreement within reach; and
- the related implications for the sustainable development goals.

We assess and compare mid-century decarbonization pathways for key regions: Brazil, China, EU, India, Japan, and the US.

CD-LINKS is a collaborative project of 19 institutes from Europe, Asia and the Americas.
